

MOS.25 COMPANY PROFILE &

PRODUCT PORTFOLIO

MOS.25 COMPANY PROFILE

MOS.25 – who we are, where we come from

MOS.25 – Quality, Service & sustainable Mounting Systems

With over **25 years of experience in the development and planning of mounting solutions** for photovoltaic systems in Europe and the USA, we are launching MOS.25 with **long-proven and innovative mounting systems** and the aim of making a **real contribution to the energy transition**.

MOS.25 defines itself as a link between **development, industry, and high-performance customers**. We attach great importance to **close cooperation and partnership** with all these stakeholders.

We are starting out in a **dynamic market environment** and are well equipped to meet the challenges it presents.

Together with our customers, we **exploit potential and find optimal solutions**.

Our competitive range of products, the development of new technologies, and our dedicated employees are the **key to our sustainable success**.

We are delighted to welcome you aboard this journey!

What MOS.25 stands for

Service

We support customers to reach the desired result and make this process as pleasant as possible.

Customer proximity

We know our customers, the market and their challenges.

Technological advantage

We always find the best solution for our customers.

Price advantage

We always offer our customers (cost-)optimized solutions to make our offerings as attractive as possible.

Industry proximity

We work closely and reliably with partners in manufacturing to promote their innovative strength so our customers can benefit from technical and cost-optimized solutions.

Innovation

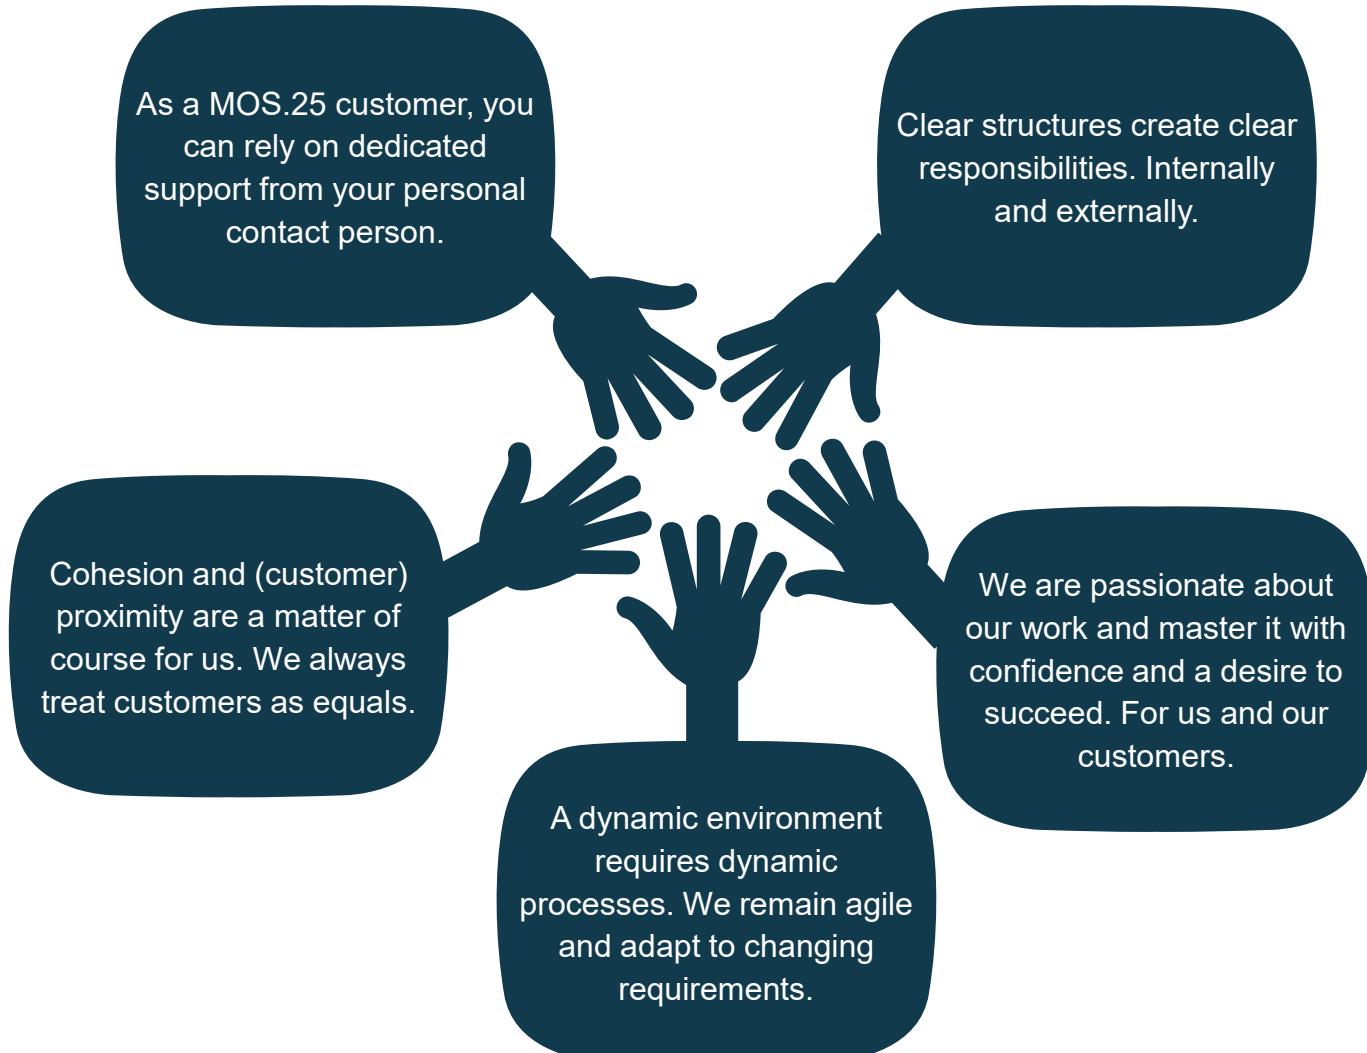

Thanks to our many years of experience and expertise in the industry, we stimulate improvement processes that affect all areas of business – even beyond our product portfolio.

Team spirit

We love what we do – a fact that customers, partners, suppliers, and our employees alike can feel.

MOS.25 Team

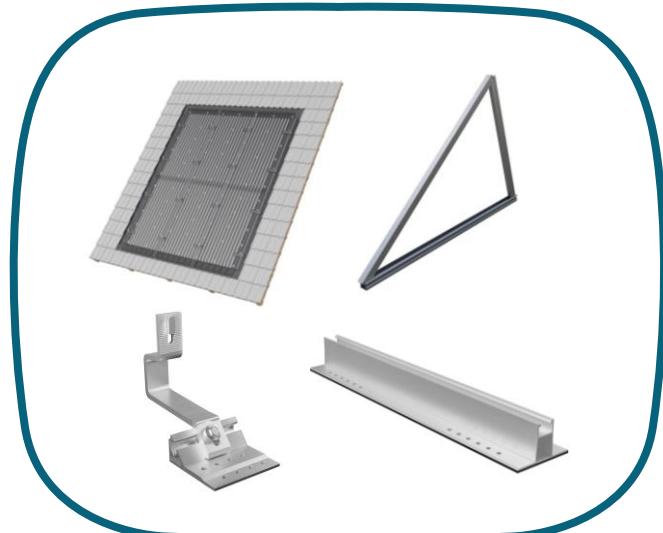

Together towards success

We are pleased to present a selection of our portfolio here.

You can find more products from our PITCHED range in our catalog - [connect with us](#) to learn about the latest assortment!

Roof Hooks

Solar Fastener & Hanger Bolts

Module Clamps

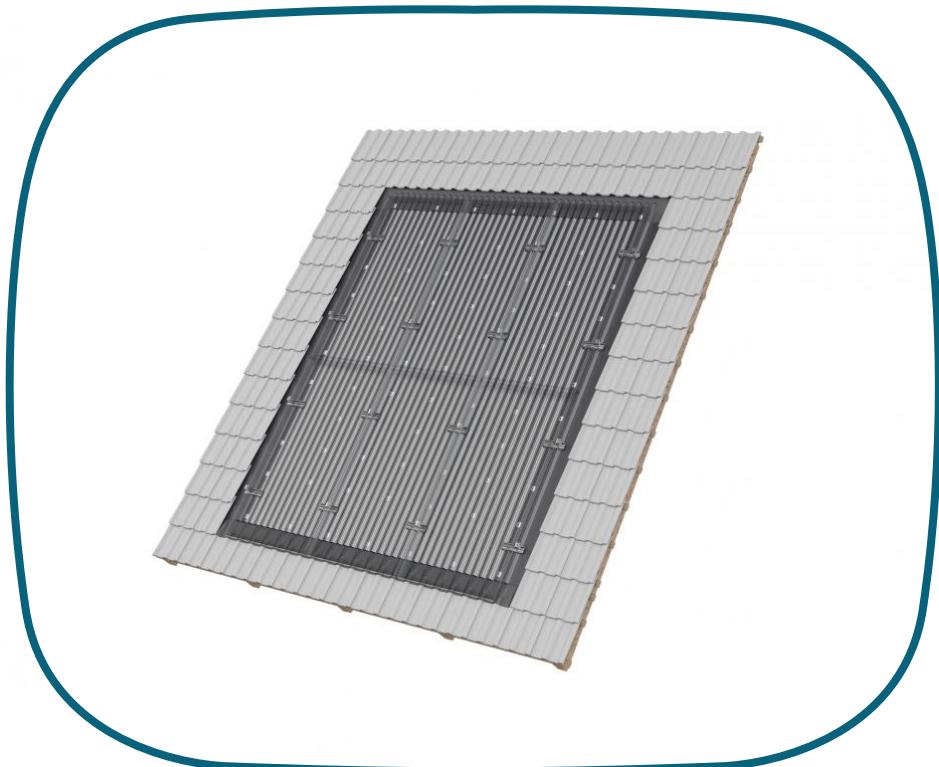

Metal Roof Series

Seam Clamps

PITCHED

In-roof

System solutions are planned and offered to our customers on a project-specific basis!

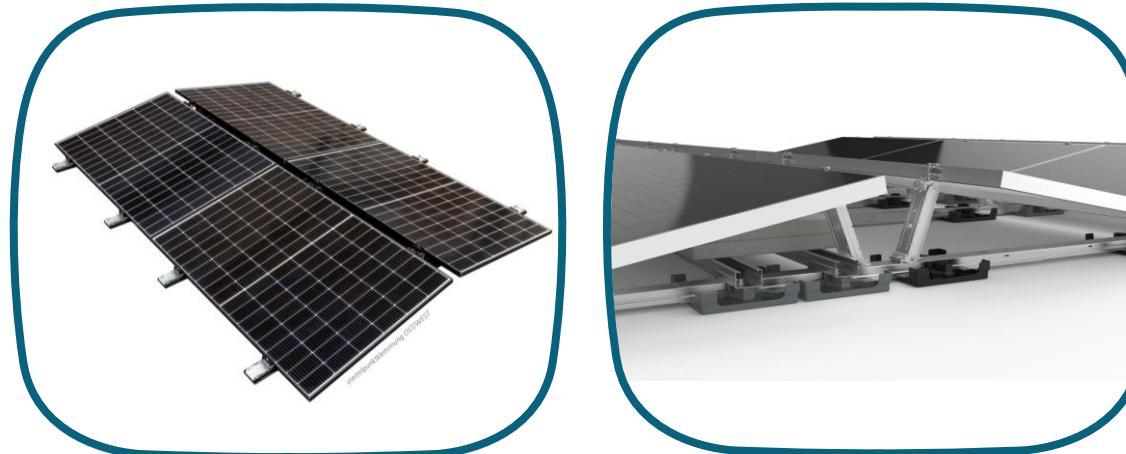

- Aesthetic roof integration in old and new buildings
- Replaces the original roofing and thus saves tiles in the module area
- Suitable for all common rafter widths
- Fulfils the criteria for hard roofing and therefore protects against flying sparks
- Connection to existing battens results in optimized force transmission
- Avoids thermal bridges

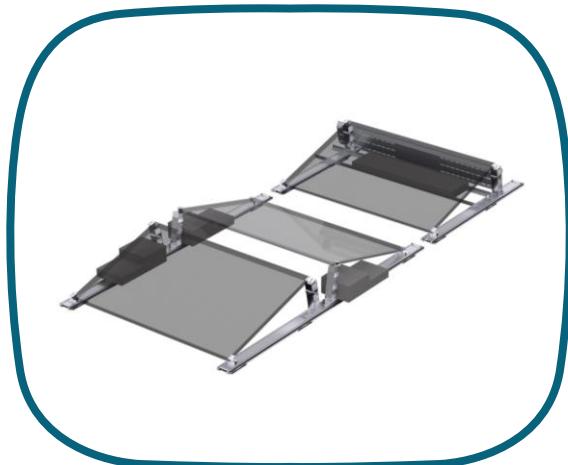

MOS.25 FLAT

FLAT

System solutions are planned and offered to our customers on a project-specific basis!

Systems for open spaces

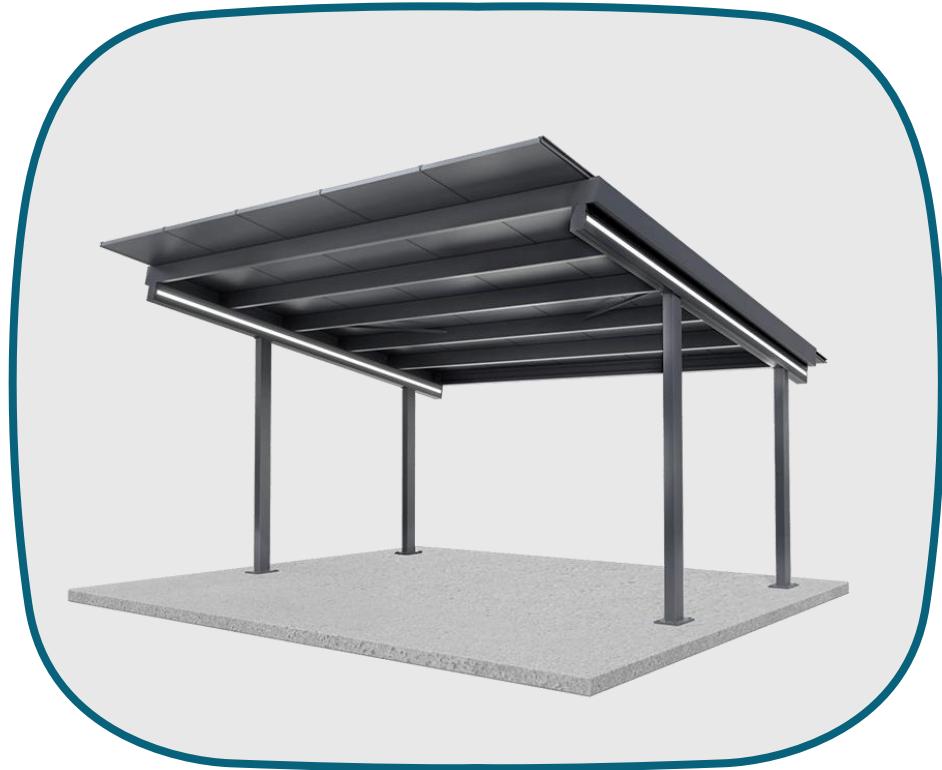

System solutions are planned and offered to our customers on a project-specific basis!

- Modular system, freely selectable number of modules from 6 – 100
- Optional installation of inverter
- Foundation rammed, bolted, or on concrete foundation
- Pitch angle between 10 – 35° possible
- South- or East-West orientation
- Suitable for portrait and landscape mounting
- Complies with construction standards PN-EN 1990 and PN-EN 1993
- Suitable for all common PV modules

GROUND

Solar Carports

System solutions are planned and offered to our customers on a project-specific basis!

- Wide range of solutions for cars or trucks
- For the commercial and residential sector
- Modular expansion options
- 10° pitch angle for optimal yields
- Integration of roof gutter possible
- Inverter installation according to individual specifications
- Coating made of corrosion-resistant Magnelis
- Foundation rammed, bolted, or on concrete foundation

MOS.25 VERTICAL

VERTICAL

Facade system

System solutions are planned and offered to our customers on a project-specific basis!

- Aesthetic design for a harmonious integration into the facade
- Use of corrosion-resistant materials guarantee a durable and sustainable system
- Low-maintenance system due to a sturdy construction
- Integrated potential equalization & water drainage
- Modular system suitable for landscape or portrait mounting
- Fits a wide range of module and facade types

THANK YOU FOR YOUR ATTENTION!

WE LOOK FORWARD TO WORKING WITH YOU.
